What have you learned today?

# The social app that encourages students to become reflective learners

Tiltr is a social media app focused on learning. Tiltr is designed to encourage students (and teachers) to become more reflective learners, to engage with their learning and develop productive learning habits.

Tiltr stands for Today I Learned - and by posting 'Tils' a learner becomes a Tiltr. But unlike the big social media apps (like Twitter and Instagram), Tiltr is just for individual schools and it's under the control of each school.

# Why we are developing Tiltr

Tiltr asks a simple question: what have you learned today? And by consistently asking students and teachers to answer this question, Tiltr aims to help people develop the valuable habit of reflecting on daily activity.

Academics call the process of reflection metacognition, and there is strong evidence (<http://educationendowmentfoundation.org.uk/toolkit/meta-cognitive-and-self-regulation-strategies/>) to suggest that metacognition and self regulation has a positive effect on learning outcomes.

But while the process of regular reflection is valuable, the growing record of learning reflection is an equally valuable output of Tiltr.

Schools have lots of information about individual student performance, but comparatively little about their learning. Tiltr makes it surprisingly easy to generate this evidence in the form of a simple but rich learning portfolio that grows over time.

“Children have lots of bits of information about their performance in school but not much about their learning. Tiltr is a superb tool for helping students start on the process of recording and reflecting on their learning.”

Simon Mason, Head Teacher,  
Honywood Community Science School,  
Essex

“The students have been posting about what they’ve learnt that day and they can also see what their friends have been learning. It’s been nice to get that interaction going.”

Teacher, The Manor Academy,  
Nottinghamshire

“The room is completely buzzing when students are using Tiltr.”

Teacher, The Manor Academy,  
Nottinghamshire

## Inviting schools to join our closed beta

Tiltr is currently in a closed beta phase of development. We've co-developed Tiltr with two secondary schools in the UK and the feedback and impact has been fantastic. Both are committed to making their schools genuine learning environments in the sense of developing a strong ethos around learning for both students and teachers. Both are also committed to using new technologies (tablets, smartphones, social media) in ways that can genuinely deepen and enhance learning.

But we're keen to broaden our base of teachers and schools. If you'd like to test-drive the free Tiltr service in your school, or even just with one of your classes, why not sign up to our beta program and we'll be in touch with you directly.

Join the beta (<http://eepurl.com/TlhpP>)
